Good news - no Eshoo letter on delay. ☺

Positive we'd still get one from R's. Well see.

Sara, given the report of new changes being circulated, Anna will no longer be sending the letter calling for delay. That's not to say her concerns have been satisfied by any means, but I think she will give the Chairman a chance to see what he can come up with by Thursday. Also just a heads up, if the R's do still go through with sending a letter, it sounds like it might not set a specific timeframe for delay, but leave it up to the FCC to decide.
